

## We have the data you're looking for.

You're in the business of selling. We're in the business of knowing who you're selling to. Whether your campaign utilizes Mail, Email, Phone, or the Internet, we have the data you're looking for. You need doctors in zip code 90210? We got 'em. You want to know who's going to buy your new Business Opportunity? Allow us to introduce them to you. No matter what the idea, no matter who the target market is, American Name Services can help.

### *Postal. Email. Phone.*

We can provide you with access to over 200 million households across the country, 14 million business addresses, or every golfer in the tri-state area, between the ages of 20-30 years old, that owns their own home, has kids, and make more than \$75K a year. (I think you get the picture).

### *America's Names*

With ANS's America's Names service, you can find out how many potential customers there are that fit your criteria. Just give us a call and we'll get the right numbers for the audience you're looking for. And for you broader thinkers out there, we have International Data too!

We understand that low prices are really not a bargain when quality suffers. We are constantly updating our lists so you get the highest response and deliverability rates possible. At ANS, we provide superior data, give outstanding service, yet still keep our prices competitive. Contact our sales department today, and let us help you generate higher profits from your next direct marketing campaign. Our fresh ideas will keep you mailing smart, improve your bottom line, and maximize your ROI.
